

Progress DataDirect DIS Products End of Life

Frequently Asked Questions

February 20, 2024

Progress periodically reviews the needs and priorities of its customers, identifying new and changing priorities. As part of those reviews, Progress is officially announcing today the End of Life (EOL) of its Data Integration Suite (DIS) products which include the DataDirect XML Converters, DataDirect XQuery and Stylus Studio XML products effective November 30, 2024 (“EOL Date”). It is important to us that you receive the service and support needed to be successful. To help guide you through the transition and better understand the impact on your business, we are sharing the below FAQ (Frequently Asked Questions).

If you have additional questions or concerns, contact your [Account Manager](#).

Why have we received this EOL notification for these DataDirect products?

Our records indicate that you have purchased one or multiple of these products. If our records are incorrect, please contact your Account Manager.

Why has Progress decided to End of Life these DataDirect products?

At Progress, we continuously assess our product offerings to ensure we are delivering market value to our customers. Upon review of these products, we found that they either were limited in their adoption by customers and partners and generated a minimal portion of the overall Progress revenue, and/or were no longer aligned with the product strategy. We determined it is more beneficial for all of us to invest our time and resources in other DataDirect product areas.

Are we able to leverage Trade in Value (TIV) for these products towards other DataDirect products?

There is no alternative Progress DataDirect product that we can offer as a trade-in for any of these products.

What is the migration path for these products?

There is no one-for-one alternative Progress DataDirect product that we can offer as a migration path for any of these products. Existing customers with a perpetual license can continue using the product(s) indefinitely on an “as-is” basis. “As-is” means that they will no longer receive future product enhancement or technical support once their maintenance period ends.

There may potentially be suitable third-party alternatives for customers of these products. Please contact your [Account Manager](#) to learn more.

What happens over the next ten months?

Effective today, February 20, 2024, all versions of the DIS products enter the Retired Phase. Refer to section 2.4.4.3 of the [Progress DataDirect Life Cycle Guide](#) to understand Retired Phase.

What happens at the End of Life on November 30, 2024?

Progress products that have entered End of Life status will no longer be updated.

What about renewals and existing maintenance?

If an active maintenance contract's term expires before the EOL Date, customers will be able to renew the maintenance until three months before the End-of-Life date. The maintenance renewal will be co-terminated up to EOL Date. OEM distribution licenses can also be renewed until three months before the EOL Date co-terminated up to EOL Date.

There may potentially be suitable third-party alternatives for customers of these products. Please contact your [Account Manager](#) to learn more.

Will there be any reconciliation based on the remaining term contract period?

Please contact [Account Manager](#) to discuss your specific contract terms and conditions and the provision for reconciliation.

How will we receive technical support?

Once your maintenance and support agreements expire, technical support will not be available. You can continue to use the product on an “as-is” basis without receiving support or product enhancements. We will provide commercially reasonable effort support for customers with an active maintenance contract. Knowledge Base articles and documentation will remain accessible as resources. If you find a product issue, we will try our best to provide you with a workaround.

Who do I reach out to for assistance or with additional questions?

We have prepared this FAQ to hopefully address all your questions. If you have additional questions, please [contact your Progress account manager](#), or refer to the [Progress DataDirect Life Cycle Guide](#).
